This report, based on KEYHOLE photography through [REDACTED], updates information on Launch Area G(7)*, Svobodnyy ICBM Complex, contained in NPIC/R-229/64, dated April 1964. 1/ Launch Area G (51-38N 127-58E), located 10 nm southwest of the complex support facility, consists of a completed Type IIIA launch site and a site support facility (Figure 1). The launch area was first identified in a midstage of construction in [REDACTED] and can be negated on photography of [REDACTED]

[REDACTED] Construction of the launch area was considered complete in [REDACTED]

The launch site contains a loop road enclosing 3 launch silos, an earth-mounded control bunker on the north side of the silos, 2 possible semiburied tanks, and an earth-mounded possible structure adjacent to the easternmost silo. Short access roads connect the silos with the loop road. A probable spray

pond is north of the loop road. Two earth-mounded missile RIM buildings and 4 smaller buildings are southwest of the loop road. [REDACTED]

very small structure is located 1,800 feet east and southeast, respectively, of the launch site and a small earth-mounded building is adjacent to the site access road. No security fencing is identifiable around the launch site, although ground scarring indicates the possibility of a double fence.

The site support facility is 2,500 feet north of the launch site. It consists of an administration and housing section which contains 38 buildings, including 9 barracks-type buildings. Four other buildings are north-northwest of the site support facility, adjacent to the complex main road. At least 14 buildings have been removed from the site support facility since [REDACTED]
